Manfred Aull Joins the Executive Management Team of Cube Optics AG as Senior Vice President Sales

Mainz, Germany – March 18, 2008 – Cube Optics AG, the supplier of engineered components and access network solutions to the telecommunications industry, is delighted to welcome Manfred Aull into its Management Team.

Manfred Aull comes to Cube Optics from Scientific-Atlanta after its acquisition by Cisco Systems. Manfred's focus will now be to lead the Cube Optics drive to fully understand your business goals as well as subsequent requirements and to meet them in the best possible way utilizing our proven solutions. His career spans 16 years in the information & communication industry, where he held senior sales and management positions at Siemens, NK Networks and Scientific-Atlanta/Cisco.

Dr. Francis Nedvidek, CEO of Cube Optics notes that the "Executive Management" team, the Board of Directors and our customers are all pleased with Manfred's addition to the Cube Optics Team. Francis added "we have achieved ambitious revenue and profitability goals during the past years and Manfred's talent and skill shall certainly play a major role in ensuring that we achieve the company's equally aggressive future growth objectives."

Manfred responds: "I am enormously excited to be part of the Cube Optics' promising destiny. Francis and his team have achieved a strong market presence for a platform of optical networking products that meet the cost, the performance and the upgradability requirements of competitive broadband access networks."

From its headquarters in Mainz, Cube Optics is commercially exploiting a range of optical components, modules and solutions, based on its low-cost

active/passive integration platform tailored to the demands of access networks. The company is enjoying significant revenue growth driven by the rising demand in telecommunications, cable, and video distribution applications.

Manfred Aull has filled a series of senior executive sales and management positions in the information & communication industry. Prior to joining Cube Optics, he served as Sales Director Central Europe for Scientific-Atlanta / Cisco. Prior to Scientific-Atlanta / Cisco Mr. Aull was member of the management board of NK Networks and before his tenure with NK Networks served as Vice President Sales at Siemens ICN.

Mr. Aull holds a Master's degree in Physics from the Technische Universität München and an Executive MBA from Duke University, Fuqua School of Business. He also holds a Eur. Ing. designation from the European Federation of National Engineering Associations.

About Cube Optics

Cube Optics sells a family of ultra-compact optical components and modules tailored to the demands of the access network. Its innovative active/passive optical packaging platforms enables the Company to provide outside-plant Telcordia approved, bandwidth enhancing solutions at compelling price points. This miniature packaging platform leverages advanced micro-injection molding techniques and enables network operators to realize low-cost, high performance architectures for large and small network deployments as well as legacy infrastructure upgrades. Cube Optics' products have been implemented in a wide variety of applications including local loop unbundling, HFC capacity upgrades and FTTX roll outs including equipment for access networks test and measurement. The Company is based in Mainz, Germany, and The Carlyle Group, Star Ventures, Target Partners and Sevin Rosen Funds are among its main investors.
